3. To procure articles from a cooperative it is best to bring articles to exchange. Otherwise, the items are very expensive. Two kilograms of soap may be exchanged for one kilogram of butter. Two kilograms of butter may be exchanged for one meter of colored cotton cloth. Corn is sold to consumers for 13 lek per kilogram, and wheat for 15 lek per kilogram.

4. There are three classes of laborers in Albania: First Class, Second Class, and Third Class. The First Class workers receive 202 lek per day, the Second Class 180 lek per day, and the Third Class 140 lek per day. Civil servants receive 3,000 to 3,800 lek per month, and doctors receive 6,000 to 8,000 lek per month.

5. Prior to 1952 farmers had to give five kilograms of beans to the government for every 25 dynums of land.¹ For 1952 they must give 33.5 kilograms of beans for every 85 dynums of land. In 1951 the farmers had to give two kilograms of wool for every 45 dynums of land. In 1952 this amount was increased to four kilograms for every 45 dynums of land. The tax on corn and wheat, eight kilograms per dynum, has remained the same. The tax on eggs has decreased from eight per dynum to 5.5 per dynum. A person who has five animals must give 2.5 kilograms of meat.

6. Animals are also taxed according to their "work value". The work value of a horse is calculated to be 6,000 lek, and a 600 lek tax must be paid to the government. A tax of 300 lek is paid on the work value of a donkey and 600 lek on the work value of a cow. A tax of 15 lek is paid on each chicken. Those who sell wood must pay a 100 lek tax from the 600 lek that they receive for each cubic meter.

7. Bachelors 18 years of age or older must pay a tax of 200 lek per month.

8. The government keeps 3 percent of each worker's salary.

25X1 1. Comment: 1 dynum = $\frac{1}{4}$ acre.
